

Bell Micro goes XXX

Channel Distributor launches unbranded NAS box

By: [Our Channel Expert](#) Wednesday 20 April 2005, 10:30

DISTRIBUTOR BELL MICRO US will ship a \$900 entry level, unbranded, toaster size NAS box.

Depending on spec, prices scale to \$2,999.

Here's the tech spec: The NASXXX will be ship from 1 June with four configuration densities, 320GB RAID 0 and 1, 750GB RAID 0,1 and 5, 1.6TB RAID 0,1 and 5 and the 2.0TB with RAID 0,1 and 5.

Components come from Intel, Sanmina-SCI and ApplianceWare and are assembled by Bell Micro.

The Intel technology includes an Intel 80219 processor based on Intel XScale technology and an Intel 31244 4-port SATA controller to leverage new high-capacity SATA Disk Drives. Integrated Intel(R) Gigabit Ethernet enables attachment to state-of-art LAN technology.

The system also features Intel(R) Flash Memory. μ
